BOOK SYNOPSIS

Foster children are more likely than other children to be involved in risky activities online due to backgrounds of neglect and abuse, an absence of supportive adults, lower self-esteem, and greater exposure to drugs and alcohol. Covering all the dangers of online technology that your foster child might encounter, from cyberbullying and "sexting", to child grooming and online hoaxes, this book pays particular attention to dangers unique to foster families, such as the difficulties internet access poses for maintaining formal arrangements for contact with birth families. DeGarmo equips foster parents and professionals with strategies to keep foster children safe online, giving tips on establishing expectations for internet usage, advice on how to prevent inappropriate contact and protect personal information, and explaining the importance of "netiquette". An indispensable guide to negotiating online dangers, this is required reading for all foster families as well as residential child care workers, social workers and other professionals working with children in care.
