BOOK SYNOPSIS

Special Feature! Includes online bonus information crosswalking The Joint Commission life safety standards and the NFPA Life Safety Code. Fire safety is so important in a health care setting that the Joint Commission has devoted a new standards chapter to it. The "Life Safety" Chapter is designed to make both life safety compliance and evaluation easier. Its structure directly reflects the Life Safety Code--the National Fire Protection Association's code to help organizations protect patients, staff, and visitors from threats posed by fire. And it's right in synch with the Joint Commission's Statement of Conditions (SOC), the tool through which organizations can create Plans for Improvement (PFIs) to address any deficiencies related to the Life Safety Code. The Life Safety Book: A Guide to Using the Joint Commission Life Safety Chapter and the Statement of Conditions helps organizations understand the relationship of the new "Life Safety" Chapter and the updated Statement of Conditions and effectively use them to ensure patient and staff protection from the risk of fire. This comprehensive guide to fire safety is invaluable for facility managers in ambulatory, behavioral, critical access hospital, hospital, long term care, and home care/hospice settings. Special Features: Explanation of the "Life Safety" Chapter and how it relates to the Life Safety Code Occupancy-specific requirements of the Life Safety Code How surveyors will use the "Life Safety" Chapter and the SOC during the survey Information on how to keep the SOC up-to-date and use it as a living process for facility management Information on Interim Life Safety Measures (ILSM) and the equivalency process to address fire safety deficiencies Plus Crosswalks between the Joint Commission life safety standards and the NFPA Life Safety Code The complete "Life Safety" Chapter for reference Step-by-step instructions on how to convert an existing spreadsheet to the SO
